

R\_ExpectCovarInfluence

```
graph LR; A[R_ExpectCovarInfluence] --> B[C_ExpectCovarInfluence]; A --> C[ncol]; A --> D[nrow];
```

A diagram illustrating the relationships between variables. A central node, **R\_ExpectCovarInfluence**, is shown in a black box with white text. Three arrows originate from its right side: one points diagonally up and to the right to a white box labeled **C\_ExpectCovarInfluence**; one points horizontally to the right to a white box labeled **ncol**; and one points diagonally down and to the right to a white box labeled **nrow**.
